### *Martin Resorts Unveils Project To Improve Access To The California Coastal Trail*

Martin Resorts has embarked on a coastal restoration project. Upon completion, it will improve and provide contiguous accessibility to the California Coastal Trail.

A local team is leading the project. The General Contractor is JC Baldwin and Terra Costa is the Civil/Geo-technical engineer. Both Terra Costa and JC Baldwin have won numerous awards for their bluff preservation and restoration construction. These firms' experience and environmental mindedness combined with local engineers Cannon and Associates create a winning local team.

This project is the culmination of many years of work with the California Coastal Commission and included rigorous environmental and archaeological reviews.

- Maximize public access to the beach and scenic corridor
- Protect the natural environment
- Improve and provide contiguous accessibility to the California Coastal Trail
